

## **HEALTH AND SAFETY: IOSH Working Safely**

Working Safely is a one day course for staff from any sector with no supervisory or managerial responsibility. It provides a grounding in the essentials of health and safety – everyone at work should have an understanding of why they must “work safely” and this course offers exactly that. Working Safely provides a completely new approach to health and safety training and offers all the basics in a high impact interactive package.

The course comprises five modules as follows:

- Module 1 – Introduction
- Module 2 – Defining hazard and risk
- Module 3 – Identifying common hazards
- Module 4 – Improving safety performance
- Module 5 – Protecting our environment

Candidates who attend the course and successfully complete the written and practical assessments have a choice of accreditation – either an IOSH Working Safely Certificate or an IOSH Passport Card.
